

## Repairing Cut or Torn Pages with Tape

Supplies:

Easy Bind Tape

Scissors

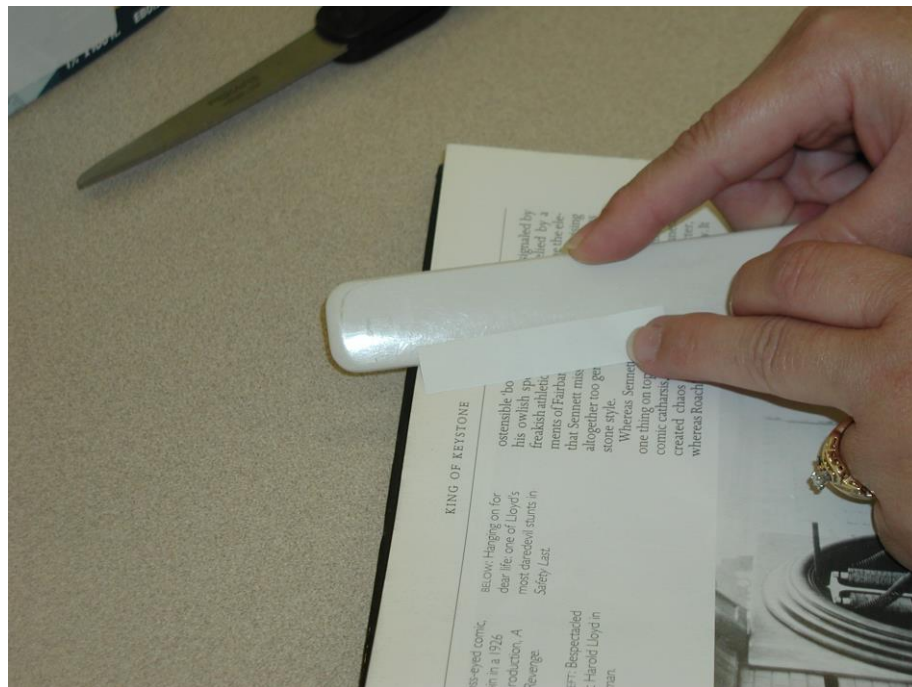

Bone Folder

1. Cut a piece of tape  $\frac{1}{4}$  inch longer than the tear. Remove the center strip from the tape and Center over the tear allowing the tape to extend beyond the tear.

2. Working from the center, smooth out the individual sides as you remove the paper backing from the tape.

3. Smooth out with the bone folder to work the adhesive smoothly into the page and to remove any air bubbles.
